Collagenase NB for Tissue Dissociation

Collagenase Qualities

Isolation of Pancreatic Islets

Chromatographically highly purified **Collagenase NB 1 Premium Grade** with very low levels of secondary proteolytic activities and endotoxins guarantee high yields and viability of isolated cells. **Neutral Protease NB** is an essential additive, and is provided separately allowing individual dosage and high stability of the enzymes.

Isolation of Sensitive Cells

Purified **Collagenase NB 8 Broad Range** is characterized by an increased collagenase activity and reduced levels of other proteases and bacterial endotoxins.

Isolation of Various Cell Types

Optimal tissue dissociation can be achieved by using collagenase with a balanced ratio of other proteolytic activities:

- **Collagenase NB 4 Standard Grade**
- **Collagenase NB 4G Proved Grade**
- **Collagenase NB 5 Sterile Grade**

Mild and effective – Collagenase NB 4 Standard Grade for optimal isolation of a broad variety of cells.

Function tested – Collagenase NB 4G Proved Grade is especially suitable for isolation of adipocytes, fibroblasts, hepatocytes, frog oocytes, chondrocytes and stem cells.

Ready to use – Collagenase NB 5 Sterile Grade is produced under aseptic conditions according to the European Pharmacopoeia.

Production Compliant to cGMP

Good Manufacturing Practice for Cell Isolation

Production of cells by tissue dissociation as well as tissue engineering for transplantation into humans require quality standards according to cGMP guidelines:

- **Collagenase NB 1 GMP Grade**
- **Neutral Protease NB GMP Grade**
- **Collagenase NB 6 GMP Grade**

Such enzymes are regarded to be critical raw materials and thus manufactured in compliance with the EU-Guide to current Good Manufacturing Practice “cGMP for active pharmaceutical ingredients”. Moreover the production fulfills the requirements of TSE (transmissible spongiform encephalopathy) guidelines according to the European Pharmacopoeia.

For incoming goods inspection according to cGMP, **Reference Collagenases** are available.

All **Collagenase NB qualities** are manufactured at the pharmaceutical plant of Nordmark Arzneimittel GmbH & Co. KG in Uetersen, Germany, which is the world's largest manufacturer of collagenase. TSE safety of the fermentation product has been certified by the European Authorities, EDQM and by supplier's certificate of origin. Application of pharmaceutical manufacturing standards guarantees a high quality of the products with a reliable lot-to-lot consistency.

TECHNICAL NOTES

*PZ activity according to Wünsch, measured at 25 °C

SERVA Collagenase NB is not intended for use in humans.

Responsibility for use of these enzymes in clinical applications and the methods to isolate, purify, cultivate and transplant cells lies solely with the providing physician/researcher.
