

C E R T I F I C A T E O F O R I G I N
Neutral Protease AF GMP Grade
Cat. No. : N0003553

 from *Clostridium histolyticum*; EC 3.4.24.3 lyophil.

Process of manufacture:	Fermentation
Sub-type/biosource:	Bacterial
Microbial species:	<i>Clostridium histolyticum</i>
Genetically modified organisms used in manufacturing process:	No
Does the manufacturing process contain any animal components?	No
Country of manufacture:	Germany
Is there any commingling with other animal materials?	No
Are allergenic materials used in the manufacturing process?	The product itself is allergenic
Comments:	
The a.m. product is manufactured completely free of any animal-based material and, therefore, is not derived from specified risk material as defined in Commission Decision 97/534/EC.
